Corporate Governance

Drive your success
Corporate Governance

Corporate Governance is defined as a set of principles aimed at safeguarding the sustainable company interests according to the latest update of the Swiss Code of Best Practice for Corporate Governance.

At EY we go one step beyond.

For us good Corporate Governance is a way to create value for the company and its stakeholders. And we help our clients to do so.

Your challenges and opportunities

Nowadays companies are facing increasing requests for transparency, evidence of ethical behavior and safeguarding regulation.

To navigate across this variegated landscape and be able to take advantage of the opportunities that may arise from it, forward looking organizations are developing strong Corporate Governance practices raising them above and beyond basic compliance.

Creating a safer, transparent and dynamic corporate environment for companies, investors and all other stakeholders allows organizations to build trust and confidence, while focusing on growth and value creation.

Setting up sound Corporate Governance processes and structures, managing risk and compliance, integrating sustainable thinking in the organization, having the needed know-how, setting up the right reward system, assessing Board operations, measuring and communicating meaningful indicators: if properly managed these challenges can turn into opportunities that give you a competitive advantage.
Quick check list

- Are your Corporate Governance processes and structures aligned with the current requirements and practices?
- Is your risk management system considering the wider variety of risks your company is facing today?
- Does your compliance management system cover all relevant compliance risks?
- Have you developed a sustainability management framework?
- Do you have all competencies and information required to manage the current challenges and opportunities?
- Have you reviewed your compensation system against best practice and increased transparency?
- Have you objectively assessed the Board operations?
- Are you measuring and communicating internally and externally the most relevant indicators?
